Professional Summary

Experienced Software Test Engineer with 6.4 years in manual testing across functional, regression, sanity, and exploratory testing. Skilled in analyzing user stories, preparing test scenarios, and executing test cases to ensure high-quality software delivery. Strong exposure to defect lifecycle management, agile methodologies, and client-facing roles. Proven ability to collaborate with cross-functional teams, participate in sprint planning, and contribute to quality assurance in healthcare and finance domains. Delivered 100+ validated user stories with 95% defect-free releases and reduced defect leakage by 30%.

Technical Skills

- **Platforms:** Windows
- **Test Management Tools:** JIRA, Confluence, MS Excel
- **Documentation:** Test Strategy, Requirement Traceability Matrix (RTM), Bug Reports
- **Testing Types:** Functional, Regression, Sanity, Usability, Compatibility, Configuration, Data Volume

Key Achievements

- **Reduced bug turnaround time by 40% through proactive triage and RCA**
- **Recognized for client satisfaction and timely delivery in agile sprints**

Professional Experience

Acuity Knowledge Partners – Software Test Engineer

Bangalore, India Jan 2022 – Present

Client: Foliosure (Private Equity Portfolio Monitoring)

- **Conducted functional (UI/API), regression, exploratory, and performance testing during deployment cycles**
- **Participated in Three Amigos and Dev Box sessions to clarify user stories and improve quality**

- Estimated user stories, prioritized bugs, and collaborated with DSPO/DSBA during grooming and planning
- Created manual test cases and reports, supported pod members with feedback and RCA
- Reported bugs in JIRA with detailed context and published foundational issues across pods
- Supported release-level bug bashes and demoed stories to BA/PO for acceptance
- Performed integration and contract testing based on bandwidth and sprint scope
- Tools used: JIRA, Confluence, MS Excel

Iscribe Software Solutions Pvt Ltd – Software Test Engineer

Hyderabad, India Sept 2018 – Jan 2022

Client: Blue Cross Blue Shield (Healthcare Insurance Platform)

- Validated quoting and enrollment workflows for benefit products on PPQ and Member Portal platforms
- Performed smoke, functionality, regression, and sanity testing across multiple releases
- Prepared test scenarios and executed black-box test cases based on requirements
- Participated in bug triage meetings, client sync-ups, and prepared test status reports
- Delivered user stories in agile sprints and collaborated with onsite coordinators
- Tools used: JIRA

Education

B.Tech in Mechanical Engineering

Andhra University, 2017
